

## Motorcycle Grips (DETAILED INSTRUCTIONS)

Your Racanalok™ kit includes 2 mirror image covers for left & right handle bar grips. The Quik-gripp™ is designed with a spine & lacing tabs. Make note of the first short tab. This will be the starting point. (See Illus A) ▶▶▶

- Wipe down both grip areas with the supplied alcohol wipe.
  - Find the top center of the grip & align w spine of the Racanalok™ (Illus. B)
  - Peel the adhesive backer off, & lay the spine across the grip, making note of the first short tab. (Illus. C)
  - Fold the first short tab. Fold the next tab on the other side, continuing in a criss-cross pattern until the tabs are laced.
  - Squeeze the Quik-gripp™ around its circumference to set it. It will attain full strength over several days.
- (Removal is the opposite of installation. Clean residue w a mild adhesive solvent like alcohol.)
