

## Quick Knee Wrap

Rapid application knee wrap:  
Modular left or right side application  
This wrap tab design allows for a  
single wrap to support the entire knee joint  
It employs a central starting point right  
at the joint.  
The lock tabs are oriented  
top and bottom.  
Built in tab adjustability  
facilitates excellent fine  
tuning in the pressure  
and support of both  
joint and leg.
